BACHELOR OF APPLIED SCIENCES IN BUSINESS INFORMATICS

TECHNICAL SKILLS

Windows Server, Linux, Hyper-V, Microsoft 365, Exchange, Entra ID, Azure, Networking, Firewalls, Swyx IP Telephony, PowerShell, Bash, Ansible, Docker, Terraform, Git, CI/CD, React, Next.js, Vue, TypeScript, JavaScript, REST APIs, Nginx, PostgreSQL

LANGUAGES

- German – C1
- English – Very good
- Serbian – Native

PROFILE

System and Network Administrator with over 6 years of experience in IT infrastructure and managed services. Strong background in the administration and maintenance of Windows and Linux server infrastructure, Microsoft 365 environments, networking, and security solutions, with a clear focus on stable, reliable, and efficient IT operations. Alongside my infrastructure work, I actively build web applications using React, Next.js, Vue, and Node.js/PostgreSQL, combining system administration with modern software development, Docker containerization, and Infrastructure as Code (Terraform).

PROFESSIONAL EXPERIENCE

ITM GmbH (Rosenheim) - System & Network Administrator 2019 - present

- Administration and maintenance of Hyper-V-based Windows server infrastructure and Linux systems for business customers.
- Administration and setup of Linux web and database servers.
- Writing Bash and PowerShell scripts to automate routine system tasks and deployments.
- Managing Docker containers for hosting applications and internal services.
- Management of Windows server environments including file servers, terminal servers, and related systems.
- Administration of firewall solutions such as Lancom and Sophos, as well as Veeam backup and recovery systems and IP telephony.
- Administration of Microsoft 365 environments, including Exchange Online, Teams, SharePoint, and OneDrive.
- Administration of Microsoft Azure and Entra ID, including identity, access, and user management.
- Daily analysis and resolution of more complex technical incidents in productive customer environments.
- Direct communication and technical support for business users, primarily in German.

Freelance - Web Application Development 2023 - present

- Freelance development of full-stack web applications using modern JavaScript/TypeScript frameworks.
- Design and implementation of responsive frontend interfaces based on React, Vue, and Next.js.
- Development and integration of RESTful APIs, backend services, and PostgreSQL databases.
- Deployment and maintenance of Docker-based Linux environments for development and production use.
- Setting up automated CI/CD pipelines (GitHub Actions) for seamless application deployment.
- Provisioning and management of hosting infrastructure on Hetzner and AWS.
- Ongoing expansion of expertise in automation and Infrastructure as Code, with a focus on Terraform.
